PROJECTS

BOTNET FILE IDENTIFICATION AND STRATEGIES FOR NETWORK SECURITY

The proposed web application is to detect botnet files in network traffic accurately, the system should be able to identify different types of botnet files including malware, command-and control(c&c) traffic, and other malicious files.

RAIN DETECTOR DEVICE WITH GSM NOTIFICATION

Here is an easy project which will give the alarm when there is rain, so that we can make some actions for rain water harvesting and also save the rain water for using it later.

FOOD WASTAGE REDUCTION

Developed an android application which helps to hotels and restaurants to donate remaining food, the donated food can be utilized by different charity organisations like Orphanages, old age homes etc.
